Strong Business Fundamentals

Revenue from the Company's mobile games continued to grow at a rate that significantly outpaces the industry average, with 13% growth in Q2 2016 from Q1 2016, while performing in-line with industry averages for Facebook / Web. According to Eilers research, mobile revenue for the entire social casino space grew 3.4% quarter-over-quarter. Tangelo's mobile games growth was, in particular, driven by strong performance from its Old Vegas game, which offers players a classic-style slot machine experience.

The Company is continuing to press forward on accelerating its mobile growth by leveraging its broad game library, creating a multi-game environment for its Spanish-language leading game title "Mundijuegos" and creating a common infrastructure that will allow Tangelo to develop new games faster. Additionally, Tangelo has begun integrating Akamon game content into the Best Casino App.

Operational Consolidation

In Q2 2016, the Company decisively moved forward to integrate its businesses into one consolidated operating unit. As previously announced, the Company reached an agreement with the founders of Diwip that included their resignation from their full time roles as managers of the Diwip business and, subsequent to the quarter-end, a settlement of all outstanding amounts owed under the acquisition agreement. Subsequent to the quarter end, the Company moved forward with an initiative to right-size its organization and realize operating efficiencies, reducing its workforce by 25%.
