Game Description

Fortune Crown AI is a 5-reel, 3-rows, 10 lines game. The number of lines is fixed, meaning that the player always bets on all 10 lines. The game has a fruit-classic theme.

The different symbols on the reels pay (according to the paytable) if the same symbol appears on a payline from left to right. For instance, if the symbol Lemon appears on the first, second and third reel of a single payline, this is awarded as a 3-of-a-kind Lemon win. Only the highest win of each line is awarded and all wins are added together.

This game has a Transform Feature. The Wild expands on the entire reel if there is a possible winning combination after expanding. During the transform feature, all symbols on the same reel as the Wild will be transformed into Wild. Wild is only available on reels 2, 3 and 4.

This game also has three AI Features. The AI Features can be bought/enabled in the same way as the Buy Feature. Only 1 AI Feature can be enabled and played at a time. Each AI Feature takes place at the end of a spin and consists of a smart transformation of the symbols in order to give the maximum possible payout with the symbols currently in the matrix.

There are 3 AI Features:

- Smart Reel Order: at the end of the spin, the reels move and change their ordering choosing the one that gives the maximum payout;
- Smart Wild Shift: at the end of the spin, all visible Wild symbols change their positions in the matrix and move to the position that gives the maximum payout (each Wild symbol swaps its initial position with the symbol in the final position);
- Smart Symbols Rotation: at the end of the spin, outer symbols rotate and stop into the best paying position.

Denomination

The denomination of the game (value of 1 credit) is set to 0.01 €.

All currency related values in the game are always displayed and formatted according to the denomination, using the dot “.” as separator for the cents (e.g. a win of one and a half euros will be displayed as 1.50).

Bet options

The number of paylines on which the player can bet is fixed: player always bets on all 10 paylines. The total bet is defined as the number of paylines (fixed to 10) multiplied by the bet-multiplier, which is the amount of credits bet on each payline.

Allowed values for the bet-multiplier are: 1, 2, 3, 4, 6, 8, 10, 20, 30, 40, 80, 200, 300, 400, 500, 1000

This corresponds to the following minimum and maximum bet:

Minimum bet: 0.10 €

Maximum bet: 100.00 €

Game configuration
